SUMMARY

Passionate MERN stack developer, certified full stack web developer from Almbetter, creating scalable and 80% efficient web applications. My goal is to obtain a full-time job in web development job where my skills in Front-end/ Backend development will benefit my employer.

EXPERIENCE

Software Developer

Searchosis Marketing

September 2024 - Present, Gurugram

- Develop CRM and client dashboards using ERPnext and React.js, ensuring seamless user experience.
- Create and test REST APIs with Postman utilizing HTML, CSS, JavaScript, JSON, and Jinja for coding.
- Collaborate with the Flutter team to ensure cross-platform functionality and smooth integration.

Research Analyst

Quest Sampling

February 2024 - September 2024, Gurugram

- Designed and developed survey pages using React.js, aligning with project requirements and client needs.
- Analyzed and maintained public response data using Excel and Power BI for insightful reporting.
- Collaborated cross-functionally to deliver innovative solutions, while managing testing, deployment, and troubleshooting.

Front-end Developer Intern

Helperts

December 2023 - February 2024, Bengaluru

- Developed responsive web applications using React.js, Tailwind CSS, and JavaScript, enhancing user experience.
- Collaborated on UI/UX design implementation with Figma, ensuring pixel-perfect front-end development.
- Managed version control and project collaboration via GitHub, streamlining workflows and code maintenance.

PROJECTS

Quiz Platform

Almbetter • quiz-platform.netlify.app/ • August 2023 - August 2024

- Implemented Agile methodology in a 3-week sprint for frontend design and development using React and Redux-thunk.
- Developed a quiz application with features to create, access, delete quizzes, and control visibility, using React-router and localStorage.
- Enhanced project efficiency by 25% with input validation and extensive testing, ensuring robust and responsive design with Material UI.

Helperts Website

Helperts • www.helperts.com/ • December 2023 - February 2024

- Collaborated with a team to develop the Helperts website, creating responsive interfaces with React.js, Tailwind CSS, and Figma designs, optimizing performance using JavaScript, and managing version control through GitHub.

E-Commerce Website

Almbetter • mysmartkart.vercel.app/ • July 2023 - July 2023

- This provides a user-friendly platform allowing them to Purchase desired products.
- Improved project efficiency by implementing Firebase authentication and Firebase Storage. Also, extensive code improvement was carried out, reducing the project's time complexity by 15%.
- Utilized API for fetching the product data. TailwindCSS is used for responsive UI design. ReactJS is used for the front-end UI/UX Design.
- Implemented login and signup page by using Firebase Authentication. The website also uses a local storage mechanism to prevent the loss of saved data in case of page refreshing.
